Table

365_course_info

Column Name	Column Type (Python)	Column Description
course_id	Int	Object course id
course_title	Str	Object course name

365_course_ratings

Column Name	Column Type (Python)	Column Description
course_id	Int	Object course id
student_id	Int	Object student id
course_rating	Int	Object course rating
date_rated	datetime64 [NumPy]	Object date

365_exam_info

Column Name	Column Type (Python)	Column Description
exam_id	Int	Object exam id
exam_category	Int	Object exam category
exam_duration	Int	Object exam duration

365_quiz_info

Column Name	Column Type (Python)	Column Description
quiz_id	Int	Object quiz id
question_id	Int	Object question id
answer_id	Int	Object answer id
answer_correct	Str	Object answer correct

365_student_engagement

Column Name	Column Type (Python)	Column Description
engagement_id	Int	Object engagement id
student_id	Int	Object student id
engagement_quizzes	Int	Object engagement quizzes
engagement_exams	Int	Object engagement exams
engagement_lessons	Int	Object engagement lessons
date_engaged	datetime64 [NumPy]	Object date engaged

365_student_exams

Column Name	Column Type (Python)	Column Description
exam_attempt_id	Int	Object exam attempt id
student_id	Int	Object student id
exam_id	Int	Object exam id
exam_completion_time	Int	Object exam competition time
date_exam_completed	datetime64 [NumPy]	Object date exam completed

365_student_hub_questions

Column Name	Column Type (Python)	Column Description
hub_question_id	Int	Object hub question id
student_id	Int	Object student id
date_question_asked	datetime64 [NumPy]	Object date question asked

365_student_info

Column Name	Column Type (Python)	Column Description
student_id	Int	Object student id
student_country	Str	Object student country
date_registered	datetime64 [NumPy]	Object date registered

365_student_learning

Column Name	Column Type (Python)	Column Description
student_id	Int	Object student id
course_id	Int	Object course id
minutes_watched	Float	Object minutes watched
date_watched	datetime64 [NumPy]	Object date watched

365_student_purchases

Column Name	Column Type (Python)	Column Description
purchase_id	Int	Object purchase id
student_id	Int	Object student id
purchase_type	Str	Object purchase type
date_purchased	datetime64 [NumPy]	Object date purchased

365_student_quizzes

Column Name	Column Type (Python)	Column Description
student_id	Str	Object student id
quiz_id	Str	Object quiz id
question_id	Str	Object question id
answer_id	Float	Object answer id
